Stone Cladding

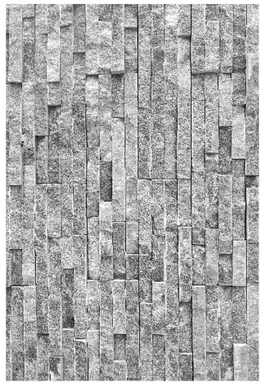
Our stone cladding collection offers a compelling substitute for conventional exterior walls, redefining the way you envision and create your spaces.

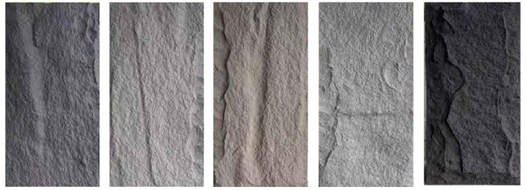
Ultra-Light Weight: Experience the beauty of natural stone with the added advantage of an ultra-light profile, minimizing structural stress.

Easy Installation: We simplify the installation process, saving time and effort.

No Mining, Eco-Friendly, and Green Certified: Crafted from recycled materials, stone cladding is an excellent choice for environmentally conscious projects.

Thermal Insulation: Tailored to suit India's diverse climatic conditions it offers superior thermal insulation, ensuring comfort and energy efficiency year-round.





Breeze Block

At the core of our breeze blocks is a commitment to redefine design through tailored precision. Crafted from environmentally conscious concrete, these pre-fabricated structures represent the epitome of customization in architecture. Whether it's altering thickness, playing with intricate designs, or experimenting with other personalized elements, breeze blocks offer a canvas for your creativity.

As a cost-effective alternative to pricey glass facades, these blocks make custom design accessible without compromising on visual appeal.

Metal Ceiling

We specialize in the production of metal ceilings, customized metal facades, and metal cladding profiles to meet the increasing demand for creative ceiling, facade, and cladding solutions. We are dedicated to offering comprehensive engineering solutions to our clients, including experienced technician supervision throughout the execution phase, ensuring precise and flawless implementation.

Carpets

Seamless, vibrant and full of character, our carpets collection is perfect for commercial applications. We offer a wide range of in-house selection of solution dyed colors and patterns in a variety of tufting styles. You can choose from our wide varieties of broadloom and carpet tiles. Combining high-performance technology with craftsmanship, our in-house team creates original and unique designs to suit every taste and requirement.

Spatial Solutions

We work with corporates to develop a brand-centric workplace design solutions that reflects their companys' values and culture.

Completing the overall look and feel of the space within the gamut of the brand and workplace sentiments, we curate objet d'art, exclusive furnishings and custom wall graphics and paintings.

We provide custom signage solutions in all styles and materiality for ease of identification, navigation and way-finding.

With complete in-house production teams for Vinyl, Frost, Signage, Art Murals, 3D fabrication to name a few; – we have become a preferred choice for entire production implementation of workplace interiors.

Digital & Immersive Solutions

We offer immersive experiences to create a unique and unforgettable brand experience for employees and visitors. This includes interactive digital installations, virtual and augmented reality experiences, and other experiential design solutions.

Holotable creates brilliant, vivid, and realistic 3-D holographic images rising from a table that enchants the audience.

Virtual Reality gives digital experience in place of a physical one. This can be integrated with hardware making the VR experievnce more immersive and engaging.

Anamorphic has the ability to showcase hyper-realistic content to the viewer which would make them feel they are coming right at them.

The Interactive Floor is an unusual and exciting medium that turns the observer into a participant by allowing them to venture into a magical world.

Digital interactive walls use motion, sound and touch to create a memorable and unique user experiences.

Infinite reflections of mirrors blended with LED lights create a geometric illusion of an endless wall.
